Jensen Property Sold.

Dr. Haworth, a former resident of Stony Plain, has acquired the Jensen 20-acre plot adjoining the town to the west. The Doctor is conducting research work for the Provincial Department of Agriculture at the present time, on a farm near Ardrossan, and it is his intention to remain where he is until 1936. The Doctor is now offering his recently-acquired property for rental, for the period of 1 year.

Convention Here on May 22.

Social Credit will hold another convention in town here Wednesday next, May 22. Three delegates from each Group in Stony Plain Constituency will meet and choose 4 nominees. From this quartet, later on, one person approved of as being 100 p.c. Social Credit will be picked as the candidate to represent this Constituency at the next Provincial election. Delegates which represented the various Groups at the Central Alberta convention in Edmonton in April will act in the same capacity on this occasion.

Fred Ulmer, Hog Raiser.

On Thursday last Mr F M Ulmer brought in one of his large leads of hogs, the larger number of these in the lead going to select. Mr Ulmer has the rare knack of bringing his hogs up to the required weight in their 5 to 6 month period, turning out the maximum animal in the minimum time of feeding.

Provincial W. L. Convention.

The 10th annual convention of Alberta W.L.s opens at the University of Alberta, Monday, May 20th to continue for 4 days. Delegates from all over the province will attend. Pres. Mrs J P Ferguson will be in the chair. Addresses of welcome will be given Tuesday by Lieut-Gov. Walsh, Dr R C Wallace, and Mayor Clarke.

Social Credit Notes.

The Stony Social Credit study club met Thursday in Kelly's hall, with the President, Mr W E Hayes in the chair. A delegation from Smithfield club was present; Messrs Ohlsen and Partridge. The latter gentleman gave a very interesting address, devoting himself to an explanation of the monthly bonus which will be paid to every adult in Alberta when the Aberhart Government starts operations; the bonus to begin with a minimum payment of \$25, and to be increased as the inflow of credit permits. The speaker claimed that the payment of this bonus did not necessarily mean an increase in taxation, as the money for the bonus would be obtained from import taxes on goods coming into the province; from the charge on the price spread, and from unrecouped increment. Mr Partridge has been doing some splendid missionary work for the Social Credit cause, visiting and giving addresses at various Group meetings practically every night in the week.

The Short Short Story.

Once Upon a Time there was a Parrot that used to Swear Something Awful. One Day He Escaped from His Cage and Wandered onto some Golf Links and Died of Shock.

Planning

In these days much is heard of the art of planning and the dire necessity for scientific, constructive planning in finance, economics, industry, social services, in fact in all the organization of our modern life and its varied interests and activities. Indeed, if a person was prepared to unthinkingly accept the advice being so freely rendered in many quarters, only one conclusion would be reached, namely, that mankind in mass could, if it would, definitely plan and order its way of life, and clearly and authoritatively scale and draw a plan that would work with the simplicity and accuracy of the multiplication table.

But life is not like that; too many contrary factors enter into the scheme of things and life, too many factors, influences and natural laws which are beyond human control to permit of any such artificial planning that will prove workable and fool proof. As the poet Burns so well expressed it:

The best laid schemes o' mice an' men
Gang aft a-gley,
An' lea'e us naught but grief and pain,
For promised joy.

Two years ago President Roosevelt's "brain trust" decided that the whole economic life of the United States could be planned and charted in advance; that it could scientifically plan and control the production of that great country so as to overcome and prevent what was alleged to be the evils of over-production. It set out to do so, but instead of facing the primary cause of the alleged over-production, it adopted and acted upon the easy formula that all that was necessary was to compel by law a reduction in the volume of production.

So wheat farmers were bonused, not to grow wheat, but to stop growing it; cotton planters were bonused to stop growing cotton; farmers were paid to quit raising hogs, and so on and so forth, and the consuming masses of the people were taxed in order to raise the funds wherewith to pay these bonuses on destruction. Then Nature stepped in, withheld its usual bountiful supply of rain, sent excessive heat and blistering winds and swirling dust storms, and in a brief space of time reduced production over man's mistaken efforts, and to a far greater extent, until within a few months a shortage of supplies faced the nation instead of an over-production, which over-production had actually resulted from a previous form of artificial planning in the shape of tariffs and other trade restrictions.

Following the Great War, the statesmen of the world assembled in Paris to draft a treaty of peace and to plan the future of Europe and the world. They labored for months, created elaborate international machinery to direct and control world affairs, re-arranged the boundaries of countries, and gave birth to new nations. On paper their plans looked good; they were hailed as a great advance in the cause of world peace and international goodwill and co-operation.

But in the years that have followed all the passions, prejudices, suspicions, racial and religious animosities, and vagaries of human nature have continued to hold sway over millions of mankind. Much of the planning has proved an abject failure, some of it has been thrown into the discard, and what remains is in danger of destruction through another world upheaval.

Thus has it been amply demonstrated that man cannot direct and control the immutable laws of Nature, nor can he forecast them in any scheme of planned economy he may devise; neither can a few planners, however able and sincere they may be, draft plans and charts which will work despite all the selfishness, the ambitions, the ignorances, passions and prejudices of man.

This being so, the nations are now being told by the planners that mankind in the mass can no longer be trusted; that democratic forms of government are a failure; that instead of the people creating and controlling their governments, forms of government must be set up which, controlled and directed by a few, will super-impose their will upon the masses, control and order the people, instead of the people controlling the governing bodies.

Such a plan may be inaugurated; it may work for a time, but not for long. It can never possess any degree of permanence, because man was created a free being with a mind, a will, a soul of his own, and in the final analysis he will, because God and his own nature intended that he must, work out his own salvation. No other power, and least of all a government, can do it for him.

The proper study of mankind is man, and the proper, only permanent, planning is by individual man, namely, that he so order his life and his activities, so control his ambitions and his passions, as to come within the plan laid down in the Golden Rule—Do unto others as ye would that they should do unto you.

Queen Mary's Tea Chest

Gift From Ceylon To Be Exhibited

Visitors to the Ceylon exhibit at the forthcoming Canadian National Exhibition in Toronto will have an opportunity to see the beautiful chest presented to Her Majesty at Christmas by the Empire Tea Growers. The chest is made of rare and lovely woods—rosewood from India, inlaid with satinwood and ebony from Ceylon and purlicheart from British Guiana, the woods being left in their natural state at the express wish of Her Majesty. The inlay on the lid has the Queen's own royal cypher. When presented to Queen Mary the chest contained fifteen pounds of the finest grown Empire tea, valued at over \$3 per pound.

Of Canadian Make

Dominion Supplies Medium-Quality Gauntlets For English Motorists. Motorist and motor cyclists in the United Kingdom wear leather gauntlets when driving during the winter. Even during the summer months motor cyclists use them when traveling at night. A large proportion of the medium-quality motor cyclist's gauntlets are of Canadian make, according to the Industrial Department of the Canadian National Railways. While the British are experts when it comes to sheepskin gloves, strange as it may seem, the makers of those made of heavier leathers, such as cow, mule and horse hide, they have to be imported.

NOT A RHEUMATIC PAIN FOR 4 YEARS

70-Year-Old Man Praises Kruschen

A man who once suffered severely from rheumatism writes—
"For a long time I suffered with rheumatism, and at times was laid up for about nine weeks. About five years ago I was advised to try Kruschen. I did so, and have continued using them ever since. Kruschen did the trick, as I have not had a rheumatic pain for over four years. I am now 70 years of age, and feeling fine, and always able for my day's work—thanks to Kruschen."

A. S. Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then if you keep up "the little drink," excess uric acid will never form again.

Helps Building Industry

Chemistry Comes To Aid With Many New Materials

Even eggs and milk are made the making of new construction materials in a building boom predicted by famous chemists at the opening session of the American Chemical Society's tercentenary celebration in New York.

A boom in the building industry inspired by discoveries of chemists, many of them made during the depression, was forecast by Prof. James R. Withrow of Ohio State University.

Artificial stones are already made in every color and with any degree of hardness a customer desires. Wood rot and metal rust are both stopped by numerous new protectives.

Bricks that partake of the lightness of thistle-down and other light weight construction materials promise much higher, yet even safer skyscrapers.

A Dangerous Procedure

Doctor Warns Against Forced Giving Of Cod Liver Oil

Dr. Irving Graef, pathologist of Bellevue hospital, New York, told the American Association of Pathologists and Bacteriologists, mineral oils and animal fats drawn into the lungs of infants and adults had proved fatal in six cases of pneumonia. Cod liver oil, described as good when taken into the stomach for bone building, Dr. Graef said was deadly when it entered the lungs. He cited one case to show the oil had entered the lungs through forcing a reluctant child to swallow it by holding his nose. 2098

How Spare Pennies Grow

British Post Office Savings Increased By \$28,000,000 Last Year

More pennies and shillings than ever are being put into Post Office Savings Banks in Britain.

The head office has announced that deposits of small savers have reached the record figure of \$355,000,000. They increased by \$28,000,000 during last year alone. Over the last two years they have increased by \$50,000,000.

These large sums are made up entirely of the occasional spare coins of villagers and townsmen in Britain. One of the methods of saving is to buy special stamps and stick them in a savings book. When a certain number have been collected the book is given in to the local post office and the amount represented is credited to the saver's account.

Last year 250,000 "home safes" were issued. These are special post office home money boxes which can be taken to the local post office when the owner desires and the amount in them credited to his account.

The Post Office Savings Bank now has more than 9,500,000 depositors. And that number is increasing by 12 per cent. each year.

Another Surgical Find

Human Suffering Reduced By Operation On Pain Nerves

Surgery on the nerves of pain offers hope of reducing human suffering.

The operations possible were reviewed by Francis C. Grant, M.D., of Philadelphia, at the meeting of the American College of Physicians.

Some of the fibres form the bundles of nerves, just as separate fibres form threads, carrying the sensation of pain; others give the movement of the muscles.

By cutting the pain fibres in the spinal cord pain can be stopped in the legs and up into the pelvis. Touch and position nerve fibres remain unimpaired and the movements of the legs are not interfered with. Another operation severs the roots of some of the nerves, but is seldom used because, while it relieves pain, it interferes with movement.

Seeking to block the "pain pathways" through the nervous system is the latest method of attack. This has been done successfully for some pelves malignancies and for angina pectoris.

Camels For Russian Farms

Farmers of Soviet Russia are to be supplied 287 camels this year to be used in the establishment of new camel farms. The farm in the samirad Yedich district of Western Kazakhstan now has 2,335 ships of the desert, the herd increasing 24 per cent. in 1934.

Upholding The British

New York Paper Hits To Statement About War Debts

The New York Daily News says: "We've received a number of unfattering letters in reply to our editorial in which we said England is right in refusing to pay any more of its war debts to us for the time being. These letters advise us that we are in the pay of the Redcoats, traitors to Uncle Sam, trying to lick the King's boots, etc."

Let's come down to brass tacks. How about our debts to our own people (and to any foreigners who happened to buy our bonds)? We aren't paying them, are we? President Roosevelt has taken 40 cents out of every dollar, and he won't pay a dollar of those debts in gold. Furthermore, our Supreme Court sustained that default. So if John Bull is a nasty old repudiator, what is Uncle Sam?

The fact is the war cost so much that every country which took part in it, including ourselves, has had to repudiate a large part of its war debts."

Bible Distribution

Colporters Deliver An Average Of 20,000 Bibles A Month

By dog team in the far north and on foot through every part of Canada, Colporters distribute an average of 20,000 Bibles a month, according to the annual report of the Canadian branch of the British and Foreign Bible Society.

An increased demand for Bibles in English is reported from foreign language groups of workers in Western Canada.

After all expenses were met, \$39,000 was sent to London for worldwide work compared with \$28,000 in 1933. Bibles distributed showed an increase of 22,000.

If on rising in the morning you stand in your pyjamas before the open window and slap your chest with both hands for several minutes you will notice a crowd slowly gathering in the street below.

Clubs for railroad workers are being organized in Russia.

Plan To Connect Vancouver And Alaska With International Highway Down Pacific Coast

"Build the Alaska highway and put Vancouver on the great international highway that reaches down the entire western fringe of the North American continent."

That is the international mission on which A. F. Holloway of Seattle is engaged. Mr. Holloway will canvass the centres of Alaska and the Yukon, and, on the return route, of Central British Columbia, securing public backing to petitions to be sent to the Dominion and provincial governments in Canada, and to the United States Congress.

Here are the main facts of the highway to date:

Pacific Yukon highway now built to Hazelton from Vancouver, distance 835 miles.

Canadian portion to be built, to Alaskan boundary, 865 miles.

Cost of Canadian portion, twelve million dollars.

United States portion to be built in Alaska, to Fairbanks, 371 miles.

Cost of United States portion, two million dollars.

This project would establish one of the world's greatest scenic tourist routes.

It would take tourists from Vancouver up through the great Fraser Canyon, thence north to the Cariboo highway, and on the northern road from Prince George to Hazelton, thence into the Yukon, with a connecting road from Prince Rupert connecting at Hazelton.

The entire Pacific coast has got in behind the project, said Mr. Holloway. Chambers of Commerce, service clubs and various organizations have gone on record in favor of it.

He is confident that the railway would be one of the greatest tourist revenue producers tapping as it does enormous resources in mining, timber, fur and big game.

"Do the citizens of Vancouver realize the importance of having such a highway completed?" Mr. Holloway wonders. "Do they realize the great benefits that will accrue, not only to Vancouver but to all British Columbia and Yukon Territory? It will be a golden highway leading to the midnight sun."

"It will," he points out, "give employment to thousands and will open up a vast territory of mineral possibilities, an enormous field for profitable investment, and an inviting region for prospectors and home-owners, as well as an area of magnificent scenic beauty."

"This is an area that must attract untold thousands of tourists and which will be a golden harvest."

In addition to these things, Mr. Holloway believes the Alaska highway will cement the friendly relations between Alaska residents and their British Columbia neighbors.

A pioneer of Seattle, and of Fairbanks, Alaska, Mr. Holloway is the author and publisher of a valuable map of Northern British Columbia, Yukon Territory and Alaska, which bears the slogan: "Open the Golden Empire of the North." It shows the proposed route of the highway, Vancouver to Fairbanks.

Sympathy Being Wasted

Modern Youth Need Not Fawn Upon Old Victorian Age

Young people to-day tend to waste too much sympathy on the Victorian woman, in the opinion of Mrs. A. R. McElnain. They pictured her, Mrs. McElnain said in an address to the Montreal Women's Club, as "languishing, shut in by three thicknesses of curtain and a heavy father."

Beginning with Queen Victoria herself, whom several biographers recently have spoken of as a statesman, Mrs. McElnain pointed out a number of women who had made notable achievements. Among them were Florence Nightingale, George Eliot, Charlotte Bronte, Elizabeth Barrett and Emily Dickinson.

"I think some of the things we cherish have come to us from the despised Victorians," said Mrs. McElnain.

Melodious Auto Horns

Research Shows They Have Great Carrying Capacity

Another cause of nervous strain, the raucous motor-horn, is an equally needless affliction. Here again research has proved that a double-toned horn tuned to a major or minor third combines great carrying capacity with absence of offense to the ear, and its use might well be standardized. The general noise of transport is hard to reduce, but it is by the glaring offenders that the nerves are jarred, and the worst of these can and should be eliminated.—Manchester Guardian.

SPECIAL OFFER 10c. SPRING FASHION BOOK

For the next two weeks the latest Fashion Book (regular 20c) will be sold at 10c when ordered with a pattern.

—See Mail Address Below—

SUMMER COTTON BLOUSES! PATTERN PROVIDES FOR BOTH STYLES

By Elise Worth

The softly draped neck blouse is very dainty looking in eyelet batiste and so exceedingly wearable.

The V-neck blouse with bow finishing the neck is colorful floral dimity print, smart for linen sports suits or wear with a separate peasant cotton skirt, now so modish.

Loads of other cottons as flannel, pique, chiffon seersucker in stripes or plaids, etc., are also suitable for these styles to make blouses.

Style No. 543 is designed for sizes 14, 16, 18 years, 20, 22 and 40 inches bust. Size 16 requires 2 1/2 yards of 38-inch material for View A. 1 1/2 yards of 38-inch material for View B. Patterns 30c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott St., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

Father: "When I was your age, my boy, I didn't have as much money as you, but I was in a much better position."

Son: "Well, it's no good growling at me, dad. Take it out on grand-father."

King Of Wheat Kings

Seager Wheeler, Wheat Grower Extraordinary, To Take A Trip To England

In recognition of his contributions to agriculture in Western Canada, Dr. Seager Wheeler, wheat grower extraordinary of Rosthern, Saskatchewan, has received a gift trip to England through a number of his friends and the Canadian Pacific Railway.

Famous throughout the world for the championship wheat that he has grown, the story of Seager Wheeler's life in Western Canada is one of resourcefulness and pluck, not unaccompanied by disappointment and temporary failure, and finally reward with a large measure of success. Emigrating to Canada from the Isle of Wight in 1885, when but a boy of sixteen, his achievements in producing strains of wheat adapted to Western Canada conditions have made him one of the Dominion's outstanding settlers. He is the only man who has the distinction of being crowned "world wheat king" five times, having won the title for championship wheat in 1911, 1914, 1915, 1918, and 1919. In addition to wheat awards Seager Wheeler has captured many prizes for oats and barley, and has also taken many awards with exhibits of various kinds of food crops, potatoes, etc. In honour of his accomplishments a doctorate was conferred on him by Queen's University.

Fast Locomotive Ready

Newest Steam Engine Can Travel 120 Miles An Hour

A 120-mile-an-hour locomotive, the answer of the steam engine builders to Diesel competition, tore through a red, white and blue veil at a locomotive works in Schenectady, N.Y., and was officially christened for service on a middle western railroad.

The engine is the first of two to run between Chicago and St. Paul. The Milwaukee, for that is her name, is an oil burning steam engine covered by a smooth metal shell.

Air Powers Are Striving To Develop Mammoth Airplanes To Transport Troops At High Speeds

Celebrating In Big Way

Britain's Great Sales Catchword This Year Is "Jubilee"

Britain is jubilee crazy. It's the chief topic of interest for every true-blue Briton and "jubilee" is the year's great sales catchword.

If a girl loves her king and empire she'll wear a red, white and blue ensemble. She will have her finger-nails tinted in red, white and blue stripes, red, white and blue striped earrings will be in her ears, and a scarf to match will be around her throat.

She will have the colors of the Union Jack in her clothes, arranged in novelty effects. Perhaps she will have a white skirt, red blouse and blue coat.

Her head will be covered with jubilee curls, her frock will be clipped with a miniature of the king and queen, and special jubilee beauty treatments will give her a "jubilee face." Those girls with blue eyes, red cheeks and white skin will be just in style.

Jubilee cocktails are the favored kind; a show which hasn't at least one "gag" about "jubilation" in it is not the jubilee hop and the jubilee blues are features at some night clubs and dance halls.

The jubilee has brought great joy to the retailers, wholesalers and manufacturers.

Windows or stores display a vast melange of merchandise arranged in a patriotic manner, with emblems of the empire made out of all sorts of things, even lingerie.

Even spring flowers in the parks around Buckingham palace have their part in the jubilee movement. Red, white and blue blooms grow in special beds.

The "Aircraft Year Book," issued by the Aeronautical Chamber of Commerce of America, says that "swift-engined machines carrying 50 soldiers with full fighting equipment, or their equivalents, is becoming what air powers are striving to develop within the next few years."

Such mammoth machines, the year book says, would be capable of 300-miles-an-hour speed at an altitude of three miles.

Of Germany and her air force, the publication says:

"Within the space of two years of the most intensive effort, Germany, with 17 aeroplane factories and nine engine plants, has succeeded in turning out some 600 military planes."

With the exception of several experimental types, including three light bombardment and one heavy bomber, none of the German planes has been developed to a state of speed and performance which would warrant matching strength with either the French or Polish equipment."

France has more combat planes than any other power, according to the publication. It goes on to say: "France has approximately 3,200 fighters, bombers and observation machines at home with some 400 others in the colonies."

"But actually, the British Empire is the strongest power in the air. The British have 2,600 combat planes, of which 1,300 are kept in the British Isles, 400 are assigned to the navy, 600 are with Royal Air Force contingents abroad, and 300 are maintained by other air forces in the dominions and other possessions of the empire."

Wheat Quality Conditions

Excellent Quality Of Western Wheat Due To Seasonal Conditions

Quality in wheat is largely determined by the character and quantity of the protein. Protein in wheat is commonly known as gluten. The character of the gluten appears to be chiefly an inherited factor but investigations by the Dominion Department of Agriculture extending over a period of thirty years have shown that the amount of this valuable constituent is largely determined by local conditions, principally precipitation, but also temperature and hours of sunshine. These investigations have been conducted at a considerable number of stations located at strategic points throughout the Dominion and the data amassed very clearly prove that the excellent quality of the wheat of the Prairie Provinces in general is largely due to favourable seasonal conditions which include high temperatures and absence of excessive moisture during the latter stages of the development of the grain. For the production of the high quality wheat, the economic value of these conditions, says the progress report for 1920-21 of the Dominion Division of Chemistry, has not been sufficiently recognized as being of equal importance to that of desirable inherited characteristics such as quality of gluten and earliness in ripening, and a fertile soil.

Stories Are All Wrong

Professor Says West Indian Voodooism Is Peaceful Religion

Stories of seamen and fiction writers of bloody voodoo rites in the West Indies have been "debunked" by Dr. Melville J. Herskovits, who recently returned from a three-month sojourn in native huts of the most primitive peoples in Haiti and western Africa.

Dr. Herskovits, professor of anthropology at Northwestern University, Chicago, has engaged for 10 years in research among black races.

"Voodooism is not the bloody terror that movies and books make of it," he said. "In reality it is a most peaceful religion. Its devotees attend ceremonies regularly on Saturday night, much in the nature of Wednesday prayer meeting. Human sacrifice is unknown."

The SNAPSHOT GUILD

Don't Overlook the Importance Of Birthday Pictures

Don't delay taking the new baby's picture and then watch him grow through monthly snapshots thereafter.

In these modern times the father is lucky if he is permitted to see his newly-born heir for several days after Sir Stork has delivered his package, unless it is through the heavy glass of a well guarded window or door in the hospital. After a few days, however, when nurses and doctors decide he is not a common carrier of germs that might attack the baby and retard its growth, he should by all means exercise authority as a father and demand permission to "shoot" the baby with a camera, of course.

Every month is usually considered a birthday in a baby's life until he is a year old. Thereafter, regular yearly birthdays are in order. At least a picture a month should be made of the new brawler and after the first twelve months you had better keep your camera loaded with film at all times for you can never tell when your baby is going to take his first cautious, faltering step—and what an event in your life—not his. It apparently means nothing to the baby, he finally struts out in a naïf, tee-hee, but careful manner, and you get all excited, let out a couple of whoops, gasp, laugh and scare the infant so thoroughly that he falls down and has to do it all over again.

The chances are that you will not be prepared for that first step, or if you were happen to be holding the camera in your hand, you may, in your excitement, even turn it in the wrong direction and get an out-of-focus picture of your own mid-section.

But don't miss this moment of moments the next time. Have your camera and yourself ready for action. There never seems to be enough of these baby pictures to go around for there are grandmothers, aunts, cousins and friends in distant cities who are always looking forward to receiving a snapshot of the newly-arrived commander of the "infantry."

Before you can realize where the days, months and years have gone your child is starting to school. The baby has grown up and before you have a chance to wonder how he will "turn out" you are wondering what time he will come home to "turn in."

Then always the "first time" for everything and this applies to thousands of events in a baby's life. There is the first time he discovers he has toes, and immediately decides in his own little mind that they are something good to eat. His first smile, and then that great moment when he reaches out with his chubby little arms and says, "Mama," which is at once interpreted by the parents to mean "Daddy," or "Mama," sometimes depending on who is "head" of the household.

So make this "Baby Picture Preparation Week" and keep your camera ready for action. You don't have to wait "until you see the whites of their eyes," as a certain military man once said, but "shoot" the minute they perform one of their fascinating, amusing little "baby" tricks.

Best for You and Baby Too

Baby's Own Soap

10 Individual cartons

WORLD HAPPENINGS BRIEFLY TOLD

The king's cancer fund will remain open during the whole jubilee season, it was announced from the office of the governor-general at Ottawa. It already has reached \$300,000.

Manitoba will increase its air force—by one seaplane. The plane, for the provincial forestry patrol service, will be the first of a plane-replacement program, as the four machines now in use are getting old. Port Arthur's jobless must break rock or they won't eat. The rock will be used for fills on other relief projects, each man being given a specified amount of rock to break for a specified amount of relief.

A hymn of Thanksgiving, written by John Masheff, poet laureate, with music by Sir Walter Davies, will be sung by 600 specially trained men of the Welsh regiment at the Aldershot tattoo in June.

The first vessel to sail into Churchill, Manitoba's northern seaport, this season will be the "Ashworth" of the Dalgleish line. The Ashworth will load cargo at Newcastle and Antwerp for western Canada. She will sail from England in July.

Major C. H. Douglas, who was in Ottawa for a few days en route to Edmonton, said he was "quite confident that effective action towards an ultimately successful conclusion of a social credit plan for Canada can be initiated in Alberta."

It cost the Viennese newspaper Die Stunde 200 schillings (currently \$50) to poke fun at Chancellor Adolf Hitler for his May Day speech. The fine was levied on charges that the newspaper had insulted the head of a foreign state.

Prime Minister Ramsay MacDonald, visiting the royal academy painting exhibition, had just entered the first hall of paintings when part of the glass ceiling of the vestibule fell. No one was in the vestibule at the time.

Looking Back Hundred Years

Coal Oil Lamps Lighted Montreal Streets In 1835

One hundred years ago Montreal's streets were lit with coal oil lamps. In April, 1835, the city was asked for a subsidy of \$100 a year by the projected gas light company. Two years later 200 gas lamps were first used to light city streets. In 1838, a new contract was made between the city and the gas company, whereby Montreal was to be supplied with 700 gas lamps. The lamps were to burn 21 nights in a month, "the other nights being declared moonlight nights."

Optimism For Pesimists

The Ottawa Journal says for the twelve months to the end of March, Canada exported goods to the value of \$59 millions, and imported to the value of \$22 millions—a total trade of \$1,181,000,000. Is there no message in this for the pesimists?

Some of the mountains on the moon may be 25,000 feet high, or not far short of the world's highest peaks.

New Antiseptic Ice Glaze

Will Save Millions of Dollars For Frozen Fish Trade
Prince Rupert scientists of the Pacific Fisheries Experimental station, where a constant program of research to benefit the fishing industry is carried on, have discovered a crack-proof "antiseptic ice-glaze" for frozen fish, which will mean millions of dollars saved for the frozen fish industry.

It is believed that the new process, for storage purposes, will prevent rusting discoloration; overcome the cracking of the glaze which resulted in stored fish drying out, and gases in the storage chamber penetrating to the surface of the fish; prevent deterioration and consequent unpalatability.

The new glaze is antiseptic, and thus kills bacteria on fish or makes them negligible.

Process invented, and already demonstrated by one British Columbia firm, with glazes costing 100,000 pounds of bait but with every success, is cheap and easy.

Sees Business Improvement

Sterling Products (Limited) Decide To Increase Advertising Expenditure

Definite improvement in business was reported at the annual meeting of Sterling Products (Limited) recently held in Windsor, Ont. An increase in advertising expenditures for the year was approved and the following officers were re-elected: H. L. Schade, president; H. L. Kinnunen, vice-president; H. C. Eastman, secretary-treasurer.

Commenting on the business outlook for the remainder of 1935, Mr. Schade said that he looked for continued improvement.

The Sterling Company distributes well-known drug products including Dr. Lyon's Tooth Powder, Watkins' Mulatid Cocoon, Shampoo Oil, Glorators, Del-A-Tone, Aspirin, Phillips' Milk of Magnesia, Phillips' Dental Magnesia, Midol, Cascarets, Dental Syrup of Figs, Danderine, Pape's Diapentine, Pape's Cold Compound, No-To-Bac, Diamond Dyes and Diamond Tints.

Little Journeys In Science

(ANIMAL PARASITES)

By GORDON H. GUEST, M.A.

An animal parasite can be defined as "an animal which lives in, or on, other organisms." Parasitism is a mode of life and is not confined to any one group of animals. Every group in the animal kingdom contains some parasitic members but those most prolific in parasites are the protozoa, the arthropods and the flat and round "worms."

The protozoa are single-celled and as a rule can only be observed by the aid of the microscope. This group of animal organisms contains quite a few parasitic forms. These include the parasites of malaria, sleeping sickness and red-water in cattle. The arthropods are mostly external parasites and they carry infecting organisms from one host to another. The biting flies, mosquitoes, lice, fleas and ticks all function in this way. The arthropod group of organisms also contain a number of true internal parasites, such as the warbles of cattle and the bots of horses, which are of much economic importance.

Parasitism always leads to specialization on the part of the parasite. Unused organs degenerate, whereas used organs become larger or more efficient. The host furnishes food and warmth and hence, in the internal parasites at least, there is a corresponding degeneration of the appendages and locomotion organs. At the same time, their power to increase in numbers becomes much greater because of the increased danger of passing from one host to another. Many young parasites fall by the way and only a few survive to continue the race.

In civilized countries parasites are not very common, although they do occur, and parasitic disease breaks out when the least chance is given. In the tropics, however, there is a continual struggle against parasites. Malaria is still the greatest killing disease in the world. The so-called plague annually claims the lives of thousands; hookworm infects sixty per cent. of the earth's population. The greatest diseases of the tropics are mostly parasitic, whereas those of the temperate climates are chiefly caused by bacteria which are played parasites.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

In certain of my articles I have endeavored to answer certain objections that some correspondents have raised regarding Graphology. As a result I have received quite a number of letters from readers expressing their agreement with my comments.

But one correspondent took issue with me, and all because of certain things I had said him about himself. Apparently I had told him that he thought too much about himself—that he was too self-satisfied.

He said that he was not at all like this—but it took him eight large pages to tell me what he did think about himself. There is nothing very much to answer to this gentleman, excepting to express the conviction that if he thought he needed eight large pages to give me his opinion of himself, then indeed my previous observations about him were correct; that, indeed, he did think too much of himself.

In the same letter there came a very broadminded letter from a man of forty years of age. He thanked me for analyzing his character, and went on to say: "Thank you for giving me the best laugh I've had in years—a laugh not at you, but at myself! When I wrote to you for a character analysis I did it with my tongue in my cheek and I was sure I was a good one on me, because I am sufficiently broadminded to know that you have got me down exactly as I am. And I have your courage in telling me the unpleasant truth, although I had asked you to show me no mercy."

Now, I don't everyone who can be so broadminded about his faults—but there is a lesson in this letter and it is the reason I have quoted it. There is no virtue in fooling ourselves! Most people have faults of one kind or another—and it is the height of wisdom to wish to learn about them, so that they may be rectified. The great trouble with most of us is that we do not really know ourselves. It takes an unbiased outsider to tell the real truth—graphology, because of its scientific accuracy, will show the real truth about you.

Would you like to have your own character analysed from your handwriting? This well-known Graphologist can help you as he has helped so many of our readers. And he may be able to help you. Send specimen of the handwriting you wish to be analysed, stating birthdate in each case. Send the card for each specimen, and enclose with a 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg News-Paper Union, 175 McDermott Ave., Winnipeg, Man. All letters will be confidential and replies will be mailed as soon as possible. Please allow about two weeks for your reply, however, owing to the volume of mail.

Salt Is Good Polish

Keeping glassware polished is a task which bothers many housewives, but there is a simple method of keeping a high polish on glasses that will save many hours of hard rubbing. Wash the glasses in hot water containing one tablespoonful of salt per quart. Do not use soap or other washing compounds. Rinse in clean hot water and your glassware will shine like crystal.

Helped by a heavy wind an aeroplane recently flew 220 miles from Croydon, England, to Amsterdam, Holland, in an hour.

BAPTISM

Golden text: Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit. Matthew 28:19.

Explanations And Comments

The Last Communion with His Disciples to Baptize, Matthew 28:19, 20. Upon a mountain in Galilee after the resurrection of Jesus the disciples saw him and worshipped him. He told them of his universal dominion—"All authority had been given me in heaven and on earth"—and gave them his world-wide commission to make his power a reality—"Go ye therefore, and make disciples of all nations."

He directed his followers to baptize disciples into the name of the Father and of the Son and of the Holy Spirit; teaching them to observe all things whatsoever he commanded. "Baptism is the name of the Father, as our Creator, Preserver, and Benefactor, who rules us, as free agents, by his love. It is (2) into the name of the Son: in baptism we accept, as Peter did, 'Thou art the Christ, the Son of the living God.' We give ourselves to be taught, and saved, and ruled, by Christ. It is (3) into the name of the Holy Spirit. We give ourselves to his guidance, as our Sanctifier, Teacher, Guide, and Comforter."

And then Jesus gave his wonderful words of comfort and encouragement and cheer: "Lo, I am with you always, even unto the end of the world."

"Morally speaking, baptism—the sacrament of personality—signifies: 'Thou art the child of God—become it!'"

Praise From New York

Times Speaks Highly Of Canada's New Governor-General

John Buchan has been described as the "best bridge" between the two continents that were once tied together with Scotland as the further bridgehead. He is now to have a conspicuous part in making the history for the next chapter of British America, whose earlier chapters he has written, but also to bring the distinction of his genius to all North America—"one of the Scotsmen who represent our English-speaking race at its very best."—New York Times.

Demand Is Increasing

The great demand for pure bred Percheron horses in Alberta which has existed for some time has lately broken all records in the history of the Percheron club. Farmers have been buying Percherons at prices \$150 to \$200 higher than last year.

Honey contains such minerals as iron, calcium, magnesium, copper, manganese and silicon.

GARDENING

Gordon L. Smith

Thinning Important

Thinning of both flowers and vegetables is most important after the plants are up an inch or so. With flowers a good rule is to have half as much space between as the plants are high. This will be about a foot between ordinary Marguerites, Petunias and Asters, two to three feet between Cosmos, and Dahlias, but only an inch or so separating tiny Alyssum, Lobelia and other edging plants. Well spaced flowers will be more sturdy, thus resisting heavy winds and rain, and the plants will be more symmetrical. Even the smallest vegetables such as lettuce and radish, must be thinned too. An inch or so will be sufficient and that is also the room that will be needed for carrots and beets, because when these things have developed roots an inch thick and two or three long, every other plant should be removed, and this procedure followed until the whole row is used up.

Hot Weather Vegetables

Tender beans, tomato plants, squash, cucumbers, and melons should not be planted outside until both weather and soil are really warm. In order to get a long and steady supply of green beans make at least three plantings at intervals of ten days and use several varieties. To do the same thing with tomatoes one may use a few well started plants should be staked, using either wooden or steel stakes about six feet high. Trim off all side shoots as they develop, training the main stem up along the stake and tying loosely about every foot. All these warm weather vegetables prefer rich open soil and any members of the melon family, that is squash, cucumber, citron, etc., takes special delight in hot sandy soil though it can be made rich with well rotted manure or good garden fertilizer. Along with the vegetables mentioned one may set out egg plants, well started peppers, and the first planting of celery. The latter must have very rich soil and water during dry weather.

Can Still Have Garden

While it is important to get a portion of seed in early in order to stretch out the season as long as possible, in practically every section of Canada it is possible to continue planting such things as beans, spinach, radish, lettuce, carrots, beets, and corn, right up to July, and if well started plants can be obtained, this late work may include, tomatoes, cabbage and cauliflower, too. In flowers it would be well to secure well started plants from the nearest green house. Of course where the whole garden is put in late, say after the middle of June, it would be well to hurry along a portion of it at least with quick acting commercial fertilizer and if possible, water. Frequent cultivation is essential.

Cuba expects to produce 2,315,000 tons of sugar this year.

ROYAL LEEVE IS HELD AT PALACE OF ST. JAMES

London.—In tones of warm affection the leaders of the empire overseas reaffirmed the loyalty of their peoples to the crown, evoking from His Majesty the King an expression of heartfelt gratitude and the vow "to work on with you in the years that remain."

Not all the glitter and pomp of the occasion could dispel the true family atmosphere as one by one the empire's prime ministers and other representatives spoke to His Majesty and the king replied in like vein. At the outset he mentioned the pleasure it gave him to hear persons from the overseas empire speak of "coming home."

Prime Minister R. B. Bennett was warm in his personal references to their majesties, saying that in their life and work together they had given the peoples of the empire an example enabling the conception of family life "which is the true basis of all human happiness and national greatness."

The occasion was a royal levee in the stately white and gold throne room of the Palace of St. James. The king and Queen Mary sat on twin thrones, His Majesty wearing the uniform of an admiral of the fleet, and the queen a blue satin gown trimmed with silver and sable fur. They were flanked by members of the royal family.

Prime Minister J. B. Hertzog spoke for South Africa, Prime Minister J. A. Lyons for Australia, Prime Minister G. W. Forbes for New Zealand. Prime Minister G. M. Huggins represented South Rhodesia. J. H. Thomas, dominions' secretary, spoke for Newfoundland, now under commission government "but yielding to none in deep-rooted devotion to your majesties' persons and throne." Sir Joseph Blore spoke for India, and Sir Philip Cunliffe-Lister for the colonial empire.

The king, wearing a bowler hat and the queen, ablaze with diamonds, threw a jubilee crowd of 50,000 into delight by twice appearing on the balcony off the Chinese room of Buckingham palace.

Despite the chill caused by a sudden break in temperature, their majesties stood for 20 minutes in their first appearance at 9:30 p.m., and then for three minutes at 10:30. The king waved his bowler to the wildly cheering throngs.

The inspiration furnished by the king "of wise and tactful leadership" and of "unswerving devotion to duty," was praised by Prime Minister Bennett as no small factor in the success of the empire in withstanding the period of stress after the war.

At the reception in St. James's palace to empire leaders and foreign diplomats, Prime Minister Bennett presented to His Majesty the gift gold casket containing the humble address of loyalty passed by the Canadian senate and House of Commons.

Missionaries In Danger

Forced To Abandon Stations In China On Account Of Communists

Toronto.—Letters received by the foreign mission board of the United Church of Canada said English missionaries in north and northeastern Szechwan province, western China, were forced to evacuate their stations because of advancing Communist forces. Capture of Chengtu, the provincial capital, was believed the objective but the drive failed.

Rev. Gerald S. Bell, of Toronto, wrote that some Canadian missionaries, due home this year on furlough, left a few weeks ahead of schedule.

To Test Parachute Plane

Los Angeles.—Col. Roscoe Turner, aviator, said he is awaiting completion of a 90-foot parachute large enough to lower a passenger plane safely to earth, to use in a series of safety-tests in mid-air. "I expect to take it aloft within 60 days," he said.

Canada On Committee

Accepts League Membership To Study Repudiation Of Treaties
Ottawa.—Without committing itself to disciplinary action against Germany or any other nation, the government of Canada has accepted a membership in the League of Nations committee established to study application of sanctions against unilateral repudiation of international obligations. Sir George Perley, acting prime minister, issued a statement setting forth the position taken by Canada.

Dr. W. A. Riddell, Canadian advisory officer at Geneva, has already notified the secretary-general of the league of Canada's acceptance and reservation. The committee was named by the league council following repudiation of parts of the treaty of Versailles by Germany.

Besides Canada the following nations were invited to take part: Great Britain, France, Chile, Hungary, Italy, The Netherlands, Poland, Portugal, Spain, Turkey, Russia and Yugoslavia.

Sir George Perley's statement read:

The invitation to Canada to accept a seat on a committee established by the council of the League of Nations to consider sanctions against unilateral repudiation of international obligations, arose out of a resolution adopted by the council on April 17.

Life History Of Quintuplets

Dr. Dafoe Will Speak At Meeting Of American Medical Association

Atlantic City, N.J.—Dr. Allan Roy Dafoe, the country physician who took New York by storm after bringing the famed Dionne quintuplets of Callander, Ont., into the world, will chart the life of his tiny charges for the annual session of the American Medical Association and the Canadian Medical Association.

The meeting, June 10 to 14, will be one of the largest ever held and it will be the first time the American and Canadian associations have joined forces for their annual sessions. It is expected about 8,000 physicians from the United States and at least 2,000 from Canada will attend.

Dr. Dafoe will exhibit a life history of the babies, and his brother, Dr. William A. Dafoe, of Toronto, will collaborate in the exhibit.

Sir Frederick Banting, Toronto co-discoverer of insulin, will take part in a special exhibit.

Dr. John S. McEacher, Calgary, is the present president of the Canadian Medical Association.

Retired Astronomer Dead

F. J. Blake Had Part In Survey Of Northwest

Toronto.—Frank L. Blake, 81, retired astronomer of the meteorological service at the Toronto observatory, died after a long illness. For many years he gave the correct time daily to many points throughout the Dominion.

In his early days after his education here was completed he took part in the survey which opened the northwest to settlement and was actively engaged in the subdivision of Moose Jaw, Saskatchewan and other important western Canada centres.

Wish To Assist Blind

Washington.—The United States house of representatives labor committee has voted to enlist U.S. support in helping the blind. It approved unanimously a measure by Representative Randolph (D, W.Va.) to permit blind persons to operate news and similar stands in federal buildings through the country.

Found West Optimistic

Ottawa.—Back from western Canada after a two weeks' speaking tour, Hon. R. B. Hanson, minister of trade and commerce, reported a strong feeling of optimism in all communities throughout the west. Prospects were for good crops in most localities, he said.

Plan New Rocket

Moscow.—Plans for a rocket which is thought capable of ascending 35,000 metres (115,142 feet) will be studied by the Soviet atmosphere committee, it was announced.

ARTHUR GIBSON

Canadian Entomologist of the Canadian Department of Agriculture, who received the honorary degree of LL.D. from Queen's University on May 8th at the Spring Convocation.

Jubilee Honors List

Awards To Be Published On Morning Of June 3rd

London.—The jubilee honors list will be published on the morning of June 3, combined with the king's birthday honors list, it was announced here. It is believed the jubilee awards will be very lengthy.

In accordance with custom, the leaders of both the opposition parties have been asked to make nominations. The liberal opposition accepted the offer. It is understood the honors they recommend include the rank of privy councillor for Isaac Foot, former secretary of mines and a member of the Indian select committee.

With regard to the Labor opposition, it is understood George Lansbury declined to make any nominations, leaving the matter in the hands of Prime Minister Ramsay MacDonald. However, it is expected Clement Attlee, deputy leader of the Labor party, will become a privy councillor and that the honor also will be conferred upon William Lunn, a former parliamentary under-secretary for the Dominions.

Travels Incognito

Sister Of Princess Marina Arrives In Victoria From Orient

Victoria.—The Princess Katharine of Greece, sister of the Princess Marina, Duchess of Kent, was a passenger on the Empress of Canada, which arrived here recently from the Orient. The princess was not on the liner's passenger list and was known to her fellow travellers as Catherine Constantin.

On the passage of the Canada, the princess was just one of the younger set, entering into the social life of the ship enthusiastically. Fellow passengers voted her a "good sport" and a charming girl.

She will proceed from here to Seattle for a visit to the United States and will embark on the Empress of Britain at Quebec for Europe early in June.

Demand For Silver Dollar

Ottawa.—The royal Canadian mint will strike off 20,000 more silver dollars and these will be made available to the public at once. So great has been the demand for the coin, issued specially for the king's silver jubilee, that the Bank of Canada has requested more to be put into circulation.

NEW JUBILEE STAMPS FOR BRITISH ISLES

Here is a photograph of the special three-halfpenny Silver Jubilee Stamp which has been issued by the British Post Office.

German Penal Code

Will Provide Something More Severe Than Headman's Axe

Berlin.—The future reich penal code, which judicial authorities believe should provide something more severe than the headman's axe, such as for example the "living death" of medieval proscription, will be based on fundamental Nazi concepts, it was learned.

All offences, now being classified by a preparatory commission, will be subdivided into three categories: Attacks against the safety of the people; attacks against the safety of the state and government; attacks against national patriotism; attacks against nationals.

Death by the headman's axe is too good for those who violate the more sacred tenets of Chancellor Adolf Hitler's code, some Nazis contend, and they plan to condemn those guilty of heinous offences to be deprived of human rights. They will be subject even to condemnation to death without trial, it is said.

Treason will head the list of crimes classified as "attacks against the safety of the people," it was reported.

Mercy Flight

Unique Incident In Aviation History Of The North

God's Lake, Man.—One of the most unique "mercy flights" in aviation history in the north was written into the records with Pilot Herb Segram of Wings Limited, the hero.

A woman was lying in hospital at Winnipeg, 350 miles south of here, seriously ill. An operation was imperative, but her physician was unwilling to proceed without the assent of her husband, at a small lake north of here.

Details were sent here by wireless, but communication with the man was complicated by the fact ice conditions would not permit landing of an aeroplane on the lake where he was staying. Segram solved the difficulty.

He dropped a message, asking if the husband wished the operation to be proceeded with, to signal by making a triangle of three limbs on the ice of the lake. The signal was given, Segram returned here and the operation was successfully performed.

Air Limitations

Great Britain Will Stipulate For 1,000 Planes As Minimum

London.—Great Britain, in preparing to discuss air limitation, will stipulate 1,600 planes as her minimum need; the diplomatic correspondent of The Daily Telegraph reports.

This estimate, he said, has emerged from British deliberations to ward making an "air Locarno" a separate item from the five-point proposition extended to Germany by the Anglo-French agreement of Feb. 3.

The plan shortly will be submitted to France and Italy, it is understood. The correspondent said the situation had changed since the Geneva air commission met in February, 1933, raising the minimum requirements.

Tame Swan Shot

Erickson, Man.—The "world's poorest sport" is being sought by police. For years a pair of white swans has been kept off here to and from, north, being fed by citizens. During a recent week-end a hunter brought one down, inflicting wounds from which it died.

PREMIER BENNETT SPEAKS ON EMPIRE TRADE MATTERS

Ottawa.—Great co-operation in trade matters between nations of the British empire was held out by Prime Minister R. B. Bennett as a solution of some economic problems of empire countries.

Mr. Bennett spoke from London in an empire broadcast and his remarks were directed primarily to the people of the United Kingdom. He told them he appreciated the honor of representing Canada at the king's jubilee celebrations and assured them Canadians would accept a second place to none in loyalty to the crown.

The empire was a "goodly fellowship," he said, and Canadians were proud to share in it. This pride was based not "on boastful imperialism" but on a realization the British crown stood for the reign of law, liberty and justice. The traditions of British institutions and loyalty to the crown had meant much to Canada in its development as a new country. They had imparted social and political stability in the formative years.

The most notable event in the king's life, he said, had been the Great War. It had meant suffering and Canada was still suffering from its effects. But Canada had emerged from it a full-fledged nation under the British crown. Canadians did not regret their part in it but hoped its lessons would not be forgotten.

How, he asked, could subjects in every part of the empire, pay tribute to the king than by dedicating themselves to the renunciation of war and the promotion of peace.

Mr. Bennett dealt with empire trade agreements from the British point of view, said they had helped Canada over a difficult period and brought increases in British exports to Canada. If these increases were not as great as might be hoped it was to be remembered that British goods were manufactured products with a "stiff neck."

Canada was now an industrial as well as an agricultural country and because of economic nationalism the world over had been forced to develop more balanced internal economy than before. Also because of debts due in the United Kingdom and elsewhere the country had to export more than it imported.

Suggestion From King

Canada Asked To Establish Permanent Cancer Fund

Ottawa.—Establishment of a permanent cancer fund in Canada was suggested by King George in a cablegram sent to the governor-general, expressing the king's thanks for donations to the jubilee cancer fund.

The king's message read: "I have received with much pleasure your telegram informing me that my people in Canada are contributing so generously towards the King George V. silver jubilee cancer fund for Canada."

I warmly thank all those who have joined in helping this most noble and humanitarian cause, and I fervently trust that a permanent fund may be established and thus further the relief of much suffering and distress.

A Naval Port

Tokyo.—Despatches from Hankow to the Rango (Japanese), News Agency said Japanese military authorities in Manchukuo had received unconfirmed reports that the Soviet is establishing a naval port at Posiet Bay near the Manchukuan border southwest of Vladivostok.

Boundary Dispute

Rome.—The possibility of conciliation of the boundary dispute between Italy and Ethiopia was pointed out by authoritative circles, but Benito Mussolini continued to push his military preparedness program.

Ferryboat Capsized

Vienna.—The Tagblatt reported in a despatch from Budapest that 20 persons had drowned in the Mares river near Nagylak on the Hungarian-Romanian frontier when a ferryboat capsized.

ABOUT RIDICULING OUR LAWMAKERS.

"It is easy for the simplest-minded citizen to assail and laugh at some of the things said and done in our Federal parliament and our Provincial legislatures," says a writer in the National Home Monthly. "That sort of thing has become a favorite sport with some citizens, who fail to realise what they are doing. The parliamentary system is the only system under which a nation can change its political forms without breaking up violently its political life. Mankind has not yet found any substitute for it which provides better safeguards against ruthless violence and disorder and fraud or against catastrophe of sudden anarchy. A people without the intelligence to elect competent, public-spirited lawmakers would be the people headed for the eventual loss of self-government. Of every country it has always been true that its citizens must either use their brains to govern themselves thru elected representatives, or eventually land themselves in the plight of following a dictatorial leader with unreasoning obedience of human sheep."

Golden Spike.

An oldtime resident of Golden Spike district passed away May 8 in the person of Mrs. Maria Sobienheim. She was born in Austria-Galicia Dec. 23, 1868, and came with her husband to this country in the year 1912, and the couple settled in the Golden Spike district, where she had resided up to the time of her death.

The funeral took place Sunday, May 12; a service being held at Zion Lutheran church by Rev. H. Frey, the pastor. Interment was made in Zion churchyard.

She is survived by her husband Carl Sobienheim; 1 son Carl; 2 sisters Mrs. M. Hennig and Mrs. Wm. Adolf; Golden Spike; 4 brothers, 1 in Chicago, 3 in Poland.

John Armbruster had charge of the funeral arrangements.

SPORTING NOTES OF LOCAL INTEREST

The Golf club got the jump on the other sports this year in the early start handicap. The club reorganized May 7, and elected these officers—

Pres. F. W. Yeats
V-Pres., Dr. Walton
Sec-treas., D. Moyer
Committee: G. Oppertshaus-
er, J. McCulla, G. Bryan

Yes, it looks as if the first hurdle is won, and with capable men at the head, they look like prime favorites to set the pace for this season.

The Tennis Club will hold its reorganization meet tonight the 16th, town hall, 9 p.m. All players are asked to attend, as nothing can be done to improve the courts unless a good turnout is on hand.

In the Softball League, the Canaries were too good for Benedicts, and went on undefeated. A feature of the game was the slugging contest; Canaries won there also, as A. Wudel & E. Enders both got home runs, while Benedicts only got the 1 made by C. Lory.

B. Hawks stopped their losing streak at the expense of Pelicans, when they just edged out an 18 to 14 win. E. W. Enders had a real field day all by himself, with a world's record of 5 errors in 1 inning.

In the baseball section we have definite information, as the teams met and decided to re-form the N. W. League. The personnel of the League will be given next week. Six teams are expected to enter, with Spruce Grove showing the best team on paper. Alberta Beach also will be a good contender. Just what the locals can put up is not known; and all we can do is hope for the best.—HCO.

A baseball game is billed for Sunday, in Stony—Centrals v. W-L.

A FINE RECEPTION IS ACCORDED THE HON. CHAS. STEWART

An Eager Crowd Fills Kelly's Hall, to Hear the Former Minister of the Interior Discuss the Present-day Political Problems.

The Hon Charles Stewart has always been accorded a hearty reception on the occasions of his public appearances in Stony Plain, and the crowd which packed Kelly's Hall on Saturday Evg. indicated that his popularity had not diminished any. The hall started to fill early, and at the starting hour of 9 the auditorium was packed.

The chair was taken by Mr Geo J Bryan, who in his introductory remarks, mentioned that, when he was traveling thru the Riding with Hon Chas Stewart, they seen many cases where many families were deprived of the comforts of life, and the poor farmer harassed by debts which he felt he'd never be able to pay.

J Royd McBride, secretary of the Provincial Liberal association, who had been up to Jasper and Edson with Mr Stewart, gave a glowing account of the enthusiastic reception given 'em at these places. At Jasper the Liberals are fully organized, and the same was said of Liberals at Edson. Mr McBride stressed the necessity of everyone seeing that his name was on the Federal list of voters.

In his ninety-minute speech Mr Stewart covered pretty thoroly subjects which are usually considered to be in the realm of Federal politics, such as the tariff, monetary reform, unemployment, balance of trade, bank credit. He told of the efforts he had made, during the past five years, both in season and out of season, to have a reduction made in the present Government's high tariff walls which keep out goods for which our wheat could be exchanged. These high tariffs, Mr Stewart felt, are causing stagnation of trade and help fill the ranks of the unemployed and work camps. By breaking down high tariff walls world markets would be re-opened, Canada would sell the products of her basic industries, and there would be a return of purchasing power to the people.

Mr Stewart touched on currency inflation, and stated his belief that a moderate form of inflation at the present time would help business considerably, be a great aid to the producing classes, and give more purchasing power to the consumer.

When the Question period arrived, it was noted that every query related to money and particularly to the bills issued by the Bank of Canada. Mr Stewart showed, in his answers, he was particularly well posted on the monetary question. Among the financial experts anxious to get information on the workings of the new National Bank were noted former Mayor Donaldson, George Bevington, P Spady, Mr Leoblick.

Muskrat, March 1—April 30

If you want a truly modern car at the lowest cost, be wise—choose a Master Chevrolet! Here is why: Chevrolet is the only lowest-priced car of 1935 that gives you a full complement of 1935 features! The new TURRET TOP roof construction, for example. Do you realize that no other car in Chevrolet's class offers you this modern, overhead protection of solid, seamless steel? Then there's KNEE-ACTION. Do you know that the Master Chevrolet is the only low-priced automobile that gives you the Knee-Action "gliding ride"—and balanced weight in the bargain! That is only mentioning two of Chevrolet's five outstanding, and exclusive features. We could go on to talk about Cable-Controlled Brakes—Fisher No-Draft Ventilation—and the Blue Flame Engine.

But if you will simply demand the modern protection of a solid steel roof above you—and the modern riding ease of Knee-Action wheels under you—you can't go wrong in choosing your next new car. You'll choose a Master Chevrolet, for quality that is all the more modern because the cost is so low!

Christian Science.

At all Christian Science churches next Sunday the subject of the Lesson-Sermon will be "Mortals and Immortals." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Now after John was put in prison, Jesus came into Galilee, preaching the gospel of the kingdom of God. And saying, the time is fulfilled, and the kingdom of God is at hand; repent ye, and believe the gospel" (Mark 1:14,15). One of the co-relative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy is as follows (page 496):—"Let Christian Science, instead of corporeal sense, support your understanding of being, and this understanding will supplant error with Truth, replace mortality with immortality, and silence discord with harmony."

Heard on Main Street.

Lunch Counter Addict—Say, I haven't come to any ham in this sandwich yet.

Hash Slinger—Try another bite, L.C.A.—(taking huge mouthful)

Nope, none yet.

Hash Slinger—Why, heck! you musta gone right past it.
